23373 7590 09/11/2007 SUGHRUE MION, PLLC 2100 PENNSYLVANIA AVENUE, N.W. SUITE 800 WASHINGTON, DC 20037			EXAMINER MEDE, ESTEVE	
			ART UNIT 2137	PAPER NUMBER
			MAIL DATE 09/11/2007	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.		Applicant(s)	
	10/779,881		YOU ET AL.	
	Examiner		Art Unit	
	Esteve Mede		2137	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 June 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-14 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Response to Amendment

1. This office action is responsive to Applicant's amendment received on 6/18/2007. Claims 1-14 are pending.
2. Objections to Specification and claims have been withdrawn due to Applicants amendment.
3. Rejection under 35 U.S.C. 101 for claims 1-14 has been withdrawn due to Applicant's amendment.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 1, 2, 3 and 9 rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al. (US 2003/0084291 A1) in view of Messerges et al. (US 2002/0157002 A1).

Regarding claims 1, 2, 3 and 9, Yamamoto discloses setting domain identification information into a predetermined device connected on one of a wired network and a wireless network and; a third step of generating a predetermined first code value and transmitting a first packet encrypted with the first code value using the domain secret key generated in the second step (paragraph 0096, lines 1-5; paragraph

0097, lines 6-9); a fourth of receiving a second packet that is encrypted with the first code value, which has been decrypted from the first encrypted packet using the domain secret key generated by another device (paragraph 108, lines 1-14; paragraph 109-, lines 1-7; paragraph); a fifth step of decrypting the second packet received in the fourth step by using the domain secret key generated in the second step and determining whether a specific bit frame of the decrypted second packet is equal to the predetermined first code value generated in the third step (paragraph 0110, lines 6-14; paragraph 0111, lines 1-5; paragraph 0115, lines 1-20); exchanging said content after completion of said setting and generating operations (para. 0005 and 0012).

However Yamamoto does not disclose generating a domain secret key using the set of domain identification information.

Messerges discloses a domain secret key is generated by a domain ID and a device unique key (see abstract; paragraph 0036 and 0068). Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Yamamoto to include the use of generating a domain secret key using set domain identification information in order to link the domain ID to a user device, such that only users with appropriate domain secret key may be able to obtain content from the content server.

Regarding claims 4-5 and 10-11, Yamamoto discloses the method wherein the domain secret key is set as resultant value of a cryptographic one-way or hash function whose input variables are the domain identification information and the device identification information (one-way function is a property of a hash function, therefore,

Art Unit: 2137

one-way function and hash function as claimed will be regarded as a hash function (paragraph 0075, lines 4-6)).

Regarding claims 6, and 12, Yamamoto discloses the method wherein the first and second code values are predetermine bits random numbers generated by the devices themselves (paragraph 0096, lines 1-5; paragraph 0119, lines 1-9).

Regarding claims 7-8 and 13-14, Yamamoto discloses the method wherein the fifth step further comprises the step of generating a session key to be used for content encryption when the specific bit frame of the second decrypted packet is equal to the predetermined first code value generated in the third step (paragraph 0104, lines 1-5) or terminating a domain authentication process when the specific bit frame is not equal to the first code value (paragraph 0112, lines 5-14; paragraph 0107, lines 1-5; paragraph 0108, lines 1-7).

Response to Arguments

6. Applicant's arguments with respect to claim 1, 2-3 and 9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Esteve Mede whose telephone number is 571-270-1594. The examiner can normally be reached on Monday thru Friday, 8:30-5:00 PM, EST.

Art Unit: 2137

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Emmanuel Moise can be reached on 571-272-3865. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
